

Curtis Packaging

Curtis Packaging has purchased wind-generated Renewable Energy Certificates to offset a portion of their electricity usage.

This commitment will allow 8,000,000 kWh of wind energy to enter into the national electricity grid from 4/1/2010 until 3/31/2012.

This purchase makes a difference for the environment and promotes our nation's energy independence. The estimated annual environmental benefit is equivalent to the carbon sequestered by 1,225 acres of trees or by removing 1,099 passenger vehicles from the road.

The Renewable Energy Certificates are supplied by leading renewable energy marketer and developer Community Energy.
